I'm trying to get Crysis 2 to run but I can't ever get past the loading screen. I've tried starting the game from the CD, from my DVD drive, using the crack they provided, loading the game in safe mode, and even with administrative rights. As far as I can see the game is working fine and loading up. I've tried changing every BIOS setting that I can think of (including the extensions, the APU, the CPU, the motherboard, and then reinstalling the OS). I've also deleted my Windows 7 user profile, although I don't think that has anything to do with this. Any help would be appreciated. A: I found a solution to the problem and I thought I'd share.
