A: Its because you have undefined variable $fileName. Read the documentation on file uploads. You need to define a variable to receive the uploaded file. Change the line in question to this and it will work. if ($_FILES["profileImg"]["error"] > 0) { echo "Error: ". $_FILES["profileImg"]["error"]. ""; } else { $file = move_uploaded_file($_FILES["profileImg"]["tmp_name"], $new_filename); } Also, I don't see the logic in this lines (although you could remove the else part) $new_filename = $fileName. time(); if ($ext!= "jpg" || $ext!= "jpeg" || $ext!= "png" || $ext!= "gif") { echo "". $lang["POLICY"]. ""; } You could save yourself some brainwaves by doing something like this (and also create the $lang array with the word POLICY): // make sure file is image type if (!in_array($ext, array("jpg", "jpeg", "png", "gif")) { echo "". $lang["POLICY"]. ""; exit; } // build new name $new_filename

= $fileName. time(); if ($ext!= "jpg" || $ext!= "jpeg" || $ext!= "png" || $ext!= "gif") { echo "". $lang["POLICY"]. ""; exit; } // move file move_uploaded_file($_FILES["profileImg"]["tmp_name"], $new_filename); // update language array $lang = array('aurelia' => $lang["POLICY"], 'biscuits' => $lang["BISCUITS"], 'birthday' => $lang["BIRTHDAY"], 'college' => $lang["
