He added, "We have asked the Department of Justice to follow up and review the matter." The Canadian government revealed this after India's External Affairs Ministry on Tuesday, in response to queries by the Canadian High Commission in New Delhi, replied to a written query asking why India was not cooperating in apprehending and deporting Dhanoa as per the extradition treaty between India and Canada. Whirlygig is an independent game developed by Rocate. The name came from the "whirlwind" image of blocks flying everywhere on the screen. A whirlygig consists of the destruction of 4 rows of blocks at once, or destroying multiple rows of blocks consecutively. Whirlygigs are cumulative, meaning that the bonuses earned cannot be cleared until the bonus piece is killed. The game does not have a timer, but does not allow the user to exceed any given row count. Game level can be saved and loaded for future use. Game levels in Whirlygig are not locked to the user, so if a user sets the game to easy, they can then save and lock the next time they want to play harder. Good blocks (good blocks are special blocks that contain good items) can be activated one at a time. A bonus can be obtained when a whirlygig is successfully completed. Category:2000 video
