## **What's new:**

**II Review You wake up surrounded by the ancient ruins of Tarmuscia. It's your first day in the world of Crusader Kings II: Finno-Ugric Unit Pack II. Unfortunately you can't do anything. Your spirit will be imprisoned and you will return to your own time. However that eventually changes and you finally are set free to live the rest of your life in ABR. That's the story of my life, I might as well tell you, and maybe you'll want to play game with me in the process. The Finnish Update, or the Finno-Ugric Unit Pack II, adds 6 new monarchs, 1 new duke and 1 new bishop to the game. It also adds a group of personal traits, one of which is a combat event. Almost everything in this update was requested by the players on Steam. Thanks to all the players who send messages! I thought a lot about what kind of content I want to cover in this series. I decided that I wanted to start with unit packs and that I wanted to be able to tell a short story with each unit pack, cover the features of each unit type and give the players an experience they won't get in the base game. I think I did a good job with this purpose. The Finno-Ugric Unit Pack II takes place during the war in the north, 1350-1381. It is a period of Finnish-Sami relations which is essential to know as many unit effects in it. It also covers the war between the Bogomils and the orthodox Christian army in the Balkans and the increase in close personal relationships between the Byzantine and the Hungarian royal families. The Finlanders also start to strengthen their economy and the eastern Baltic stops being a semi-lawless area and the trade with them normalises. Donate Content Donate Data The original Crusader Kings II campaign files contain significantly more data than the Steam version, so we have created an alternative campaign for Steam users that is a data fork from the original. This data fork can be loaded with the Steam version of the game as an alternative. Please consider downloading the Steam original. With the new Steam overlay it is much easier to load the correct Steam version. It is currently unknown when German is added, however the Steam version starts with Visby as German capital and isn't planned to be removed. Update A**
