Comments about Download Volume 1 Volume 2 Vol 3: September 11, 2018 Miss Farry got Virus and Error.!!???? September 01, 2018 Miss Dexter I am happy with the decision I made of purchasing this book from Amazon because it is very useful and I appreciate the work that you are doing. It has been a while that I was not buying from your website and I am really happy with it. I have many things in my Mind and after reading this Book I am a Happy Man Now. It is not easy to write a book like this but I am so Happy with this because it is great.

Dr. Brikowski's View of Vaccinations We think we know everything about vaccinations. I certainly do. I was a researcher in the US Congress when the theory that the MMR vaccine caused autism was first introduced to the public. However, since leaving Congress, I have had several opportunities to look into the issue for myself. This is what I have discovered. There is no question that the meningitis that is usually associated with the vaccine causes muscle pain, joint pain, and fever. Some who have the meningitis cannot remember much of the time they were sick because of the "overwhelm" that occurs. However, a few who also have a sore throat have a much worse experience. They cannot sleep at night and lose weight. As they age, certain problems associated with ageing develop as well. Some of the most well-known are dementia, pain, frailty, and neuropathy. This occurs because the system that creates nerve cells in the brain is also damaged by meningitis. Muscle wasting and other problems occur due to the loss of the nerves. Autism does not happen with just the MMR. It also occurs with polio, rubella, and herpes zoster. It should be noted that myriads of vaccines, including those for measles, mumps, chickenpox, rabies, and tetanus, are given on the same day. The vaccine given for these diseases is called the A-subunit-inactivated polio vaccine. This is a specially prepared strain of the polio virus that is given to healthy, asymptomatic individuals who will then develop an immunity to it as it grows in their own systems. Although only about one in a thousand people develop arthritis after a vaccination, it causes some. For some reason, only after this vaccine, there is an
