About Blind Maid: Since childhood, Juanna has seen the world with only her ears. She has never had the chance to look at it, and in her blind life, the world has always been a place of mystery. One day, she was attacked by a man in a dark alley and without warning, she discovered he was able to see what she could see. He could read the signs of danger and escape, and became her master. The man called himself The Origin and she became his pupil. He had her teach him about the world, so he would understand and explain what he didn't know. At first, he was just an interesting puzzle she was looking for the keys to see, but with the keys in hand, she learned much more. The Origin was gentle, but not completely crazy. He was putting her through a process to remove the blindness, and the road was hard. To gain the knowledge he taught her, she had to escape from the madhouse he was building to free the animals of the various kinds of beasts. One night, she escaped, and the doors were unlocked. The Origin opened the door and the outside world had never been so beautiful or inviting. He took her to his place, but she didn't like it. The Origin was happy and excited that she had freed the animals and would teach her how to free herself. He called his home The Blind Maid, and he would teach her everything she needed to know to become a blind person. Subscribe to our news to have access to exclusive promotions and giveaways! What's new:

Hello and welcome to another instalment of the Trainz 2019 DLC series, where we focus on creating a working demonstration/ screenshot of the various AC4400CW locomotives that have been released in the Steam version of Tracktopia. In this two week series of articles, you'll see my comments on how to create a working example of each release using Tracktopia's Z-Layout. As this week focuses on the CEFX release, we're only really going to cover the first half of each twenty-four loco release, hence reaching from 0602 onwards until a total of 1059 locos are included in the various versions of Tracktopia. Each section also relates to the Z-Layout Laying out the locomotives for each locomotive is different, and I've grouped the instructions for each release by which laying out method I used to make the respective loco appear. Each of the twenty-four locos released in this series is included inside the larger CEFX release of AC4400CW packages including both locos and multiple variants of locos for each loco itself. To keep things interesting, I decided to include a couple of fictional locos in some way or other, working or otherwise, and this meant that the three fictional locos in this first half of the series, 0602, 0606 and 0611, have since been added to the available in-game locos as intermediate 'distract' locos in layouts - that is to say that you'll be able to achieve the basic look and feel for the locos rather quickly, but will be missing the major variants of each loco that are

available for purchase in TZ's Steam workshop page. Each CEFX release is also available as a free download for the download section of the TrainzApp as well as a standalone Steam version for the CEFX AC4400CW owner. Changelog: X/13: Added some additional CEFX locomotives/variants/couplings/gearboxes. Added 0606 to the matching releases available through the TZ Steam Workshop. Updated the layouts to reflect changes in the image files being used for the rendering to ensure consistency across the various locomotive releases. X/13: Added new CEFX loco release, 0602.0602; 0606; 0609; 0610; 0604; 0611; 0603; 0659; 0602; 0609. X/11: Updated the TZ Steam Workshop link. Added 0604; 0605

SHINRAI is a visual novel featuring characters and settings from the author's other works. It is set in a parallel world where the main protagonist's family was killed by a mysterious figure, and he now has an arrow inside his heart that even the best doctors cannot remove. After two years of bed rest, the protagonist was allowed to come home by his father, but now he must return to a life of humiliation and grief.

Takuya (original writer): In the age of the death of the family, the son enters a world of life and death. This is his second go at this.

Shū (game director): How was it when you first saw the ending of the first game?

Takuya: I didn't quite understand it. It all happened so quickly, the main character finding out that he's hiding an arrow in his heart, and then his hands are literally broken, along with all of his limbs.

Shū: I personally felt like it was something that had been resolved.

Takuya: It was a bit sad, but it also felt so complete.

Shū: When I was writing it, I thought of how much I wanted to go and ask the protagonist, "Who did it?", but I thought to myself that it would be a waste to do so.

Takuya: It's important to create a story where the audience will understand it all on their own. When I watched the presentation, I thought, "Wow, this visual novel has more twists than a spiral."

Shū: When we were writing it, we were trying to create a story in which the audience would think it's a story that has been resolved, but when they get to the last moment of the main story, they'll think, "What's this all about? Where's the twist?" We were trying to change that, so I was glad when Takuya-san said that it was a big success.

Takuya: This time, the way we structured the story, there are plenty of twists.

Shū: At the beginning of our search for a story, we saw there was a police investigation, but the main character doesn't necessarily have to be a police officer. However, we thought, "If we just have him as a
