There's a dark secret behind the events of 7DRL, and it's about to be uncovered... A critical error was made, and humanity's future is on the line. A deadly virus was launched into space from the rogue planet Mar-Su, infested with aquatic shapeshifter-like creatures called AIs, and Earth's only hope is to get to the source before the rest of the cosmos is infected. The attack was carried out by a rogue scientific experiment so supernaturally advanced that they seemed like a conspiracy to their creators. And there's something else going on at M.U.R.D. Headquarters... 7DRL's signature style is at its finest in this game, making full use of the immersion potential of VR while still keeping with the light, action-packed style of the first game. ## **What's new in The Dark Prophecy:**

**is a personal project I am working on. It is a turn based game with tactical battles and like all my games, it is made with RPG Maker MV. This game has been finished for quite a while, but I really want to get more feedback on it before I release it. It has been on my PC and was ready to be released, but I need to make sure it is worth doing and I really want to get some feedback. Gameplay This game is intended for a small group, and consists of 4 to 6 people (5 max) on PC. There will of course be more characters when released. Would You Be Ashamed To Play A Match Of Sentry Knight Tactics? The Sandbox in a sense, is just a way for you to get to any stage you wish to defeat and you could have a different character for each game, which would help with the immersion aspect of the game. The story is not one of my favorite things about the game. I wanted to make it something I would want to do and create my own unique story. I want to try and tell a story in the light of a cut scene, much like Kingdom Hearts where you follow the story of Sora. How To Play Click on the green play button above to the right of your character portrait.
