The Microsoft Visual Studio and NetBeans integrated development environment (IDE) provide support for editing AutoCAD Cracked Version drawings. Among the standard drawing types available in AutoCAD is the DWG (drawing exchange format) file type. AutoCAD can read DWG and the other standard drawing formats from a wide range of computer file formats. It can also save DWG files in the same wide range of formats. A large number of third-party solutions are available on the Autodesk Exchange Apps, Autodesk World Class Technology, third-party add-ons, and CAD application stores. These include: AutoCAD Architecture, AutoCAD Civil 3D, AutoCAD Electrical, AutoCAD Mechanical, AutoCAD MEP (which combines AutoCAD Mechanical and AutoCAD Electrical), AutoCAD Structural, AutoCAD Workgroup, AutoCAD Woodworking, and AutoCAD Iron Workers. SketchUp is a cross-platform 3D modeling tool developed by Google. It supports a number of standard drawing types, including DWG, dxf, and oblique views (like 3D PDF, 3D DWG, and 3D CAD). SketchUp uses a process called "unrealistic rendering" in which the model is shown as a 2D image on a computer screen, similar to using an overhead projector. The 2D image created by SketchUp can be exported in a variety of 2D formats such as: The HTML5-based SketchUp web viewer is built into the web-browser. SketchUp is also a mobile application, available for iOS and Android. Freeware SketchUp is a free, open source 3D modeling and visualization software based on technology from Google's SketchUp. SketchUp is not an AutoCAD clone but it does include capabilities similar to those found in AutoCAD and some that differ from the AutoCAD product family. It is marketed as a cross-platform 3D modeling software that enables users to design three-dimensional models, view them onscreen or in print, and share them via the web. SketchUp is available for Windows, macOS, iOS, and Android operating systems, along with various third-party CAD systems for Windows, macOS, and Linux, including: AutoCAD LT AutoCAD ArchiCAD LT AutoCAD R14 ca3bfb1094
