Â- dxcp2015.Although the publication of the first international edition of the *Vanguard*™ journals in the field of pediatric surgery represents a major achievement, there are still many patients suffering from serious disease that are being under-diagnosed, with thousands of surgical cases happening every year in developing countries.{{@CIT1}} The publication of an Asian edition is an important step in ensuring that knowledge of disease is not lost, and that additional research can be done to improve the care of patients who have a disease that is not well documented in the world literature. Imaging is one of the new important techniques used in assessing the extent of disease or the prognosis of the patient, and has become an integral part of modern medical practice. Use of imaging in the assessment and management of pediatric surgical patients is safe and cost effective.{{@CIT2}}{ @CIT3}} However, there are still a number of challenges in the use of imaging in pediatric surgery, like availability of radiologic equipment and the quality of training of radiologists, which are particularly important in developing countries.{{@CIT4}}{ @CIT5}} The Southeast Asia group of the World Society for Pediatric Surgery (S
