
ABBYY FineReader 11 64

abby finereader 14 is the most up-to-date version, and includes the following key features: text recognition is performed using abby's in-house, ai-powered ocr engine, which boosts the accuracy of recognition compared to other document-compare apps like omnipage or pdf-xchange. the ocr engine incorporates a number of techniques, including a neural network that can analyze patterns in documents such as handwriting, optical character recognition, and text formatting. it can also account for text formatting that's not standard, and can also recognize handwritten characters and merge them with recognized text. the ocr engine supports multiple languages, including english, german, french, spanish, italian, dutch, japanese, korean, and portuguese. the verification window lets you confirm and correct the ocr results. it includes a numbered list of suggested alternatives, with the results you select at the top of the list. if you select a different reading, the result replaces the old one. document comparison lets you compare pdf files side-by-side. when you select a text block in one pdf, a list of variants is displayed, as well as the variant that's the best match for the selection. document comparison has a new feature that lets you remove or replace a text block with a new block of text. this new feature is only available in the corporate version of finereader 14. document comparison has a new feature that lets you extract text from a pdf page. select a page number, and the selection expands to include the entire page. you can then extract text, replace text, or export it as a new document.
