Take this in the library! Computational building mechanics. [With Rajasekaran; G Sankarasubramanian] It was very strange. At first glance, it didn't make any sense. But he had to do it, or his mission might be in jeopardy. He had to find all the existing articles and scientific papers on computational structural mechanics and copy them. He did not have time to study these articles on his own, so he did not know how often new articles appeared and who the author was. So he had to do it as quickly as possible.

The course is devoted to modeling the physical and mechanical properties of materials using computer technology. In particular, it discusses the modeling of the behavior of materials under load using Computational Modeling Systems (CMS). Sankarasubramanian] on Amazon.com.
