revolutionary new mclaren artura, it represents a significant step up from the outgoing 570s gt4, itself a hugely successful competition car which has achieved many race and championship wins with our customer racing teams. with lighter weight, extremely precise handling characteristics and enhanced durability, as well as the packaging and efficiency advantages and all-round serviceability for mechanics of the new v6 powertrain, the artura gt4 will set new class standards, as we are already seeing from our extensive test and development programme. if the bulb in the switch in the base is dimly lit up, please verify the following: 1) we need to make sure that

---

we have the driver's package (controller) installed, and that our firmware is up-to-date. note that our latest volantes require the latest driver package and firmware to be installed and work properly. to download the driver, go to the following page: a downloadable driver package and firmware can be downloaded. install it and continue with the firmware updates that are suggested. 2) look at the back of the switch and the back of the base, and make sure there is no damage to them. (probably you'll notice that one of the pins is shorter than the others. this is not a problem at all). if you find anything wrong with them, let our technical support team know. 3) remove all the

---

screws located on the back of the switch and on the back of the base, and also from the center. 4) if none of the above steps worked, let our technical support team know. they'll be able to help you.
