It's still a great app, but I'd like to see some broader features at some point, such as a built-in batch-rename utility, also known as heirarchical browsing. I have all the filters, styles, and similar options easily accessible from the sidebar. Plus, I can see the effect of filters directly on a layer in the Layers palette, as you can see below. I upgraded to CS6 with my last two computers. It has made me more efficient. The interface is simple from snapshots I took to my premier station. Even copying images from a camera to PS is a breeze. My pictures are not perfect especially when I had to correct the skin blemishes. Your post is a step in the right direction because I am over-all satisfied with my program.
